

SPAIN

Summer 2016

Language, Culture, & Technology in Segovia

This program is sponsored by the College of Humanities and Social Sciences and the College of Engineering. It's open to all students but is ideal for engineering majors or minors who seek to understand the relationship between technology, culture, and global society. Segovia has a unique history stemming from the blending of Christian, Jewish, and Muslim cultures. As a part of the program, students will be immersed in this culture and utilize Spanish language skills to study and experience the relationship between culture and technology in authentic settings. Participants will visit several different cities while touring cathedrals, glass factories, and other historically relevant sites.
